ADARSH K SUNDARESAN

Kerala, India | Phone: +91 8921096579 | Email: adarshksundaresan5@gmail.com
LinkedIn: linkedin.com/in/adarshksundaresan | GitHub: github.com/adarshks1238

Summary

Computer Science Engineering graduate with a strong foundation in Java, Object-Oriented Programming, Data Structures & Algorithms, and Database Management Systems. Experienced in building full-stack web development projects and REST APIs, gaining hands-on exposure to software development, debugging, testing, and problem-solving. Familiar with SDLC, STLC, Git, and GitHub. Possesses strong analytical and problem-solving skills, with the ability to quickly learn, adapt to, and work with new technologies. A self-motivated and disciplined individual with a willingness to learn new technologies and a keen interest in developing efficient, reliable, and maintainable software solutions.

Technical Skills

Programming	Java, C, Python
Java Technologies	Core Java, Object-Oriented Programming (OOP), Spring Boot (currently learning), REST APIs
Database	SQL, Database Management Systems (DBMS), PL/SQL (conceptual), MongoDB
Core CS	Data Structures & Algorithms, Object-Oriented Design
Tools & Practices	Git, GitHub, Debugging, SDLC, Postman, Selenium

Training

Java Full Stack Development Training, QSpiders, Kochi — **May 2026 – Present**

- Learning Core Java and Object-Oriented Programming concepts, and practising them by solving Data Structures & Algorithms problems in Java on LeetCode.
- Writing SQL queries and practising database management.
- Currently learning Spring Boot for building Java back-end applications, along with front-end basics in HTML, CSS, and JavaScript.

Education

Amal Jyothi College of Engineering (Autonomous) — **2022 – 2026**
Bachelor of Technology – Computer Science Engineering — CGPA: 8.02

SNHSS Poothadi — **2019 – 2021**
Higher Secondary Education (12th) — Percentage: 91.08%

St. Peter's & St. Paul's English School, Meenangadi — **2019**
Secondary Education (10th) — Percentage: 89%

Internship Experience

Cyber Security Intern, Kerala Police Academy (Cyber Wing) — **Jan 2026 – Apr 2026**
Thrissur, Kerala, India

- Reviewed system logs and digital evidence to identify anomalies, using the same methodical, detail-oriented approach as debugging and issue resolution.
- Documented findings and verification procedures for internal reporting, building habits of accuracy and structured record-keeping in a team setting.

Projects

Smart Ways – Smart Traffic Management System

- Designed a real-time traffic optimization system in Python, combining YOLOv11 for vehicle detection and an LSTM for traffic flow prediction across multiple intersection feeds.
- Implemented a Modified Priority Round Robin (PRR) scheduling algorithm to adjust signal timings dynamically, applying core algorithm design and complexity trade-off analysis.
- Tested the web dashboard UI with Selenium and backend API endpoints with Postman, validating behaviour across simulated traffic scenarios.

Cybot Intelligence – Evidence Detection System

- Built a real-time evidence detection system in Python using YOLO to identify digital devices from image and video input.
- Integrated a Retrieval-Augmented Generation (RAG) module to provide SOP guidance for forensic investigations.
- Automated report generation with annotated images and secure audit logging, supporting traceable and maintainable output.

Certifications & Presentations

- **Programming Using Java** — Infosys Springboard (Feb 2024)
- **Database Programming with SQL** — Oracle Academy (Course & Final Exam Certified, Oct 2024)
- **The Joy of Computing Using Python** — NPTEL, IIT Madras (Elite, Jul – Oct 2024)
- **Paper Presentation** — "Intelli Traffic Management System", NACORE 2025; also presented at ICIKS 2025
